Wifi password cmd command windows 7

In this article, I'm going to show you how to show hidden WiFi passwords on Windows 10,8,7 using command prompt (CMD). If you've connected your system to a WiFi before and want to know what the was password of the WiFi? Or you are currently connected to a WiFi but don't remember what the password is so you are in the right place. You can use this guide for different purposes so I've just mentioned two possible points. Related Post: How to Recover Windows 10 Password? Show Hidden WiFi Passwords on Windows 10,8,7 Using CMD In this guide, I'll show you guys 3 different methods to show hidden WiFi Passwords on Windows 10 in cleartext. You don't need any third-party software or application to do it. Just we need the default Windows command prompt that every Windows (10,8,7) have. Let's get started without any further details. If you want something that I didn't mention in this guide, please comment below this article. Related Guide: Create Partition In Windows 7 Without Formatting Click on the Windows icon with your mouse and type CMD. You'll see the command prompt show up on the start menu. Click on the Command Prompt. However, you don't need to run it as an Administrator. Run CMD as Admin Now use the commands below and execute them by CMD. You have to create a folder on your C Drive or any other drive because we store the cached WiFi Passwords on that folder. Create C:\WiFi_Passwords folder. Show WiFi Namesnetsh wlan show profile netsh wlan export profile folder=C:\WiFi_Passwords\ key=clear Now navigate to C:\WiFi_Passwords and you'll see all your saved WiFi passwords inside this folder. Right-click on one of the WiFi.XML file and open it via notepad. Open WiFi XML File The SSID shows the WiFi name and under Security, you see the password of the WiFi. In this case, my WiFi name is "wikigain" and the Security is "Password_is_Hacked". SharedKey Password This method is the easiest way and very similar to Method 1 with a bit different. Use the following commands to see your WiFi hidden password in clear text on the CMD window. You don't need to export to file like the first method. Make sure to change wikigain with your own profile name. netsh wlan show profile netsh wlan show profile key=clear Show WiFi Profile Method 3: Show Hidden WiFi Password in Windows 10 In this method, I'll show the graphical way to show your hidden Wireless password. This method will work only if you're connected to the wireless access point. Open Run >type ncpa.cpl. Right-click on your WiFi and select Status. Click Wireless Properties> check Show characters. NCPA.CPL WiFi Status Wireless Properties Video Tutorial If you don't like reading the article, we have a step by step video tutorial on how to show hidden WiFi Password on Windows 10. Conclusion In this post, I've outlined three different ways to show your hidden WiFi password. In this tutorial, you will learn how to find WiFi Password in Windows. WiFi passwords or security keys are not always easy to remember no matter whether it is of our own home network, public Wi-Fi or friends WLAN router. Wireless Fidelity connectivity allows us to move easily around, stay connected with the Internet and all that without the junk of wires. Today we are going to share how you can know see or find WiFi password in Windows 7, 8, 10, XP operating system. This tutorial is not about hacking, finding someone WiFi password. This tutorial will guide you on "how you can find WiFi password of others after connecting or already connected and used Wi-Fi networks in case you lost". If you forgot you Wireless network password you would not be able to share it with your friends, relatives etc. There are several methods to find / Check WiFi passwords of existing networks. But the first method we want to share is common and easy for all Windows, Linux, MAC, Android, iPhone platforms. Whenever you get connected to any Internet network you get an IP (Internet Protocol) which keeps on varying time to time as it is logical address while the MAC address of your computer / laptop / notebook / netbook always remains the same. The steps will remain same for Airtel broadband, BSNL LAN, Connect, Dreamtel, Tikona (India), SSE, Plusnet, EE, TalTalk, Excite, Sky, BT, Virgin (UK / United Kingdom), iiNet Australia, Comcast, AT&T, Time Warner Cable, Verizon, CenturyLink, Charter, Cox, Cable Vison, Frontier, Suddenlink, Windstream, Mediacom USA. The most used and recommended way to encrypt wireless network is using WPA2-PSK AES security mode which allows you to set 8-63 ASCII or 64 hex characters password. Also check how to find wifi password in iPhone. First, you need to connect you PC with the respected ADSL / ADSL2+ WiFi Network, then follow the below steps to know your WiFi password: Type routers IP address in the Web Browser (192.168.1.1 or 192.168.0.1 mostly) (check your modem id address) It might ask for user name & password : both of which would be either "password" or "admin" DSL Modem Router interface will open Open Wireless Settings > Security Here you will find Password / Security Key of your WiFi / Wireless network Check "Display Key" to show the wifi password IP Address of Different routers/modems: Router Brand Gateway/ Default IP Addresses 2Wire 192.168.1.1 192.168.0.1 192.168.1.254 10.0.0.138 3Com 192.168.1.1 192.168.2.1 10.10.1.1 Aztech 192.168.1.1 192.168.2.1 192.168.1.254 Belkin 192.168.1.1 192.168.2.1 10.0.0.2 10.1.1.1 Billion 192.168.1.254 10.0.0.2 Buffalo 192.168.1.1 192.168.11.1 Dell 192.168.1.1 SKY 192.168.0.1 D-Link 192.168.1.1 192.168.0.10 192.168.0.101 192.168.0.30 192.168.0.50 192.168.1.254 192.168.15.1 192.168.254.254 10.0.0.1 10.0.0.2 10.1.1.1 10.90.90.90 Edimax 192.168.2.1 Eminent 192.168.1.1 192.168.0.1 192.168.8.1 Gigabyte 192.168.1.254 Hawking 192.168.1.200 192.168.1.254 Huawei 192.168.1.1 192.168.0.1 192.168.1.10 192.168.1.210 192.168.1.254 192.168.1.99 192.168.15.1 192.168.16.1 192.168.2.1 Microsoft 192.168.0.1 192.168.10.1 192.168.15.1 192.168.20.1 192.168.30.1 192.168.62.1 192.168.100.1 192.168.102.1 192.168.1.254 Actiontec 192.168.1.1 192.168.0.1 192.168.2.1 192.168.254.254 Cisco 192.168.1.1 192.168.0.30 192.168.0.50 10.0.0.1 10.0.0.2 Airlink 192.168.1.1 192.168.2.1 Airlive 192.168.0.1 Arris 192.168.2.1 Airties 192.168.2.1 Apple 10.0.0.1 Intex 192.168.0.1 192.168.1.1 Intellinet 192.168.2.1 Inteno 192.168.1.1 192.168.0.1 Ruckus 192.168.0.22 192.168.0.1 Amped Wireless 192.168.3.1 MSI 192.168.1.254 Netgear 192.168.0.1 192.168.0.227 NetComm 192.168.1.1 192.168.10.50 192.168.20.1 10.0.0.138 Netopia 192.168.0.1 192.168.1.254 Planet 192.168.1.1 192.168.0.1 192.168.1.254 Repotec 192.168.1.1 192.168.10.1 192.168.16.1 192.168.123.254 Senao 192.168.0.1 Siemens 192.168.1.1 192.168.0.1 192.168.2.1 192.168.254.254 10.0.0.138 10.0.0.2 Sitecom 192.168.0.1 192.168.1.254 192.168.123.254 10.0.0.1 SMC Networks 192.168.1.1 192.168.0.1 192.168.2.1 10.0.0.1 10.1.10.1 Sonicwall 192.168.0.3 192.168.168 SpeedTouch 10.0.0.138 192.168.1.254 Sweex 192.168.15.1 192.168.55.1 192.168.251.1 Tenda 192.168.1.1 192.168.0.1 Thomson 192.168.0.1 192.168.1.254 192.168.100.1 TP-Link 192.168.1.1 192.168.0.254 Trendnet 192.168.1.1 192.168.0.1 192.168.0.30 192.168.0.100 192.168.1.100 192.168.1.254 192.168.10.1 192.168.10.10 192.168.10.100 192.168.2.1 192.168.223.100 200.200.200.5 U.S. Robotics 192.168.1.1 192.168.2.1 192.168.123.254 Zoom 192.168.1.1 192.168.2.1 192.168.4.1 192.168.10.1 192.168.1.254 10.0.0.2 10.0.0.138 ZTE 192.168.1.1 192.168.0.1 192.168.100.100 192.168.1.254 192.168.2.1 192.168.2.254 Zyxel 192.168.1.1 192.168.0.1 192.168.2.1 192.168.4.1 192.168.10.1 192.168.1.254 192.168.254.254 10.0.0.2 10.0.0.138 Xiaomi 192.168.31.1 Netis 192.168.1.1 Digisol 192.168.1.1 192.168.2.1 Binatone 192.168.0.1 192.168.1.2 iBall 192.168.1.1 TOTOLINK 192.168.1.1 Beetel 192.168.1.1 You can also check default access IP address of a Modem using CMD by typing "ipconfig". You Will see the Default Gateway IPS on the screen which is your default IP for the Modem. How to know find Wi-Fi password in Windows computer Go to Start Menu and Select Control Panel or Settings Click on Network and Internet >> Network & Sharing Center >> Change Adapter Setting Right click on the Network you want to connect and select Connect Now Go to Control Panel > Network and Internet > Network Connections OR Simply search for "view network connections" Right Click on the respected Network and Select STATUS A new small window will Pop-up, click on Wireless Properties Button Select the Security TAB and select Show characters The Network Security Key Field show the password of your WiFi network connection OR Click on the Wireless Network icon on lower-right corner of the taskbar Right-click on the Network Name and Select Properties Switch to the Security TAB and select Show characters You will see the password for your WiFi See Wireless network password Using command Prompt (CMD) Open CMD as administrator Type : netsh wlan show profile name="KNOW REVIEW TIPS" key=clear REPLACE "Know Review Tips" with your SSID name Key Content field will display your WLAN password The fourth method is to reset the Wireless ADSL Modem router by pressing WPS/Reset button for more than 10 seconds. But method will wipe all your broadband user name, password and other configurations, so do it at your own risk. We hope now you can easily find your WiFi network password from your computer, laptop running Windows 10, 7, 8 operating system.
